Academic Distinction Scholar, Orchestra Award

Information Technology Specialist- National Certificate

AI Scholars Program – INSPIRIT

Achieved 1st Place in State for First Tech Challenge Powerplay

WORK EXPERIENCE

iQuadra BugSprint- Intern June 2024 - present

I thrived as part of a 5-person development team, contributing to the creation of BugSprint, a web application. I handled design, front-end development utilizing ReactJS, backend development with Python APIs and Axios integration, unit testing, and even code deployment. This internship experience allowed me to gain hands-on exposure to the full development lifecycle, and I'm now aiming to solidify my skills as a full-stack developer.

Kantan Solutions Junior Full Stack Developer June 2024 - present

At Kantan Solutions, I'm part of the development team gearing up to launch a new web-based product. We're currently laying the groundwork by designing the product's database, and next, we'll be building APIs to power the front-end configuration screens. This is an exciting phase where my focus is on creating a solid foundation for the product.

Publix SuperMarkets Front Service Clerk May 2024 - present

I'm a front service clerk passionate about creating a positive shopping experience for everyone. I go the extra mile to ensure customer satisfaction by resolving inquiries and handling transactions efficiently. I'm always eager to learn new responsibilities and best practices, actively collaborating with customers and colleagues to achieve service excellence.

Circuit Runners Robotics- Marketing Director July 2023 - present

Responsible for the company's social and internet footprint. Redesigned and managed the CircuitRunners website. The site has relevant information that would help both our members and sponsors—working on adding fundraising and outreach information. We revamped the monthly newsletter for our parents and companies. I lead a team of 3 people who help execute the initiatives.

Woodruff Scout Camp, Blairsville Camp Counselor May 2023 - July 2023

I worked as a counselor teaching, monitoring, and mentoring younger scouts on the "Life Skills" merit badge. I also assisted the adult leaders by offering feedback from each day so that they could make informed plans for the next day.

Eagle Project - STEM Garden and Composting Bin May 2022 – November 2022

My eagle project was a STEM garden with four garden beds and a compost bin for my elementary science lab. The project had different design, sales, fundraising, and implementation phases and was executed successfully. Throughout this experience, I learned how to plan a large-scale project while also having to budget money for production.
